Status of Sea Ice in India Bay

The analysis of sea ice concentration through its daily variation from January 1\textsuperscript{st} to January 14\textsuperscript{th}, 2016 shows that the area of the sea ice with high concentration is reducing. The analysis is based on AMSR2 ASI sea ice concentration data product at 3.125km. The area is being monitored using Indian satellite based optical and microwave data (Resorcesat-2 AWiFS and RISAT-1 CRS SAR) as well as MODIS mosaic.
Overall, the sea ice area of high conc. Sea ice in India Bay is decreasing (Observation from Jan 01 to 14, 2016).

Data:
- AMSR2
- ASI Sea Ice Conc.
- Data Product
