Project title	<p>An exploratory study on Human discomfort over selected Indian cities using ISRO AWS data.</p> <p>Discomfort caused by important meteorological parameters namely temperature and relative humidity has been assessed for 5 major cities across India during the hot weather season of 2016. The ISRO-AWS data are used to compute the Discomfort Index. Among the 5-cities analysed, Dehradun is the most comfortable city throughout the year.</p>

Diurnal evolution of Discomfort Index over Ahmedabad for different days of May 2016.
